

US CLAIMS

1. Keratin fibre makeup composition having
 - a solids content defined by a dry solids extract of more than 45% of the total weight of the composition; and
 - an adhesion profile ≤ 2.5 , the said adhesion profile representing the ratio of the adhesive power when 20% of the said composition has evaporated (PA_{20%}) to the adhesive power at T₀ (written PA_{T₀}, T₀ corresponding to the time at which the composition is applied).
2. Composition according to Claim 1, wherein the solids content is greater than 46% by weight, preferably greater than 47%, more preferably greater than 48% or better still greater than 50% of the total weight of the composition.
3. Composition according to Claim 1, wherein the said adhesion profile is from 0.05 to 2.5; preferably from 0.1 to 2.2; more preferably from 0.2 to 2; better still from 0.3 to 1.8, even better still from 0.5 to 1.8 and preferentially from 1 to 1.8.
4. Composition according to Claim 1, comprising at least one fatty phase comprising at least one structuring agent.
5. Composition according to Claim 4, wherein the fatty phase represents from 10 to 60%, preferably from 15 to 50%, more preferably from 20 to 40% of the total weight of the composition.
6. Composition according to Claim 4, wherein the structuring agent is selected from tackifying waxes, the combinations of a specific compound with at least one oil, and mixtures thereof.
7. Composition according to Claim 6, wherein the tackifying waxes have the following

features:

- a tack ≥ 0.7 N.s, in particular ranging from 0.7 to 30 N.s.; preferably ≥ 1 N.s, in particular ranging from 1 to 20 N.s; better still ≥ 2 N.s., in particular ranging from 2 to 10 N.s;

- a hardness ≤ 3.5 MPa, preferably ranging from 0.01 to 3.5 MPa, more preferably still from 0.05 to 3 MPa, and even better still from 0.1 to 2.5 MPa.

8. Composition according to Claim 6,
10 wherein the said structuring agent consists of the combination of a specific compound with at least one oil.

9. Composition according to Claim 8,
15 wherein the specific compound is selected from semi-crystalline polymers; fatty-phase rheological agents such as polyamide-type polymers and hydrophobic silicas; and mixtures thereof.

10. Composition according to Claim 8,
20 wherein the oil is selected from volatile and non-volatile hydrocarbon oils, silicone oils and/or fluoro oils, and mixtures thereof.

11. Composition according to Claim 8,
25 wherein the oil has a molecular mass greater than or equal to 250 g/mol, in particular from 250 to 10 000 g/mol, preferably greater than or equal to 300 g/mol, in particular from 300 to 8000 g/mol, and better still greater than or equal to 400 g/mol, in particular from 400 to 5000 g/mol.

12. Composition according to Claim 8,
30 wherein the combination of a specific compound with at least one oil has:

- a tack ≥ 0.1 N.s, in particular ranging from 0.1 to 30 N.s.; preferably ≥ 0.5 N.s, in particular ranging from 0.5 to 20 N.s; better still ≥ 0.8 N.s., in particular ranging from 0.8 to 10 N.s,

and even better still ≥ 1 , in particular between 1 and 5 N.s

5 - a hardness ≤ 30 MPa, in particular ranging from 0.01 to 30 MPa, preferably from 0.05 to 25 MPa, or more preferably from 0.1 to 20 MPa.

13. Composition according to Claim 9, wherein the combination of semi-crystalline polymer with at least one oil exhibits a tack from 1 to 5 N.s and a hardness of from 0.1 to 20 MPa.

10 14. Composition according to Claim 4, wherein the structuring agent represents from 10 to 60%, preferably from 5 to 55%, more preferably from 10 to 40% of the total weight of the composition.

15 15. Composition according to Claim 1, comprising water or a mixture of water and hydrophilic organic solvent(s).

16. Composition according to Claim 15, wherein the hydrophilic organic solvent(s) is(are) selected from monoalcohols having 2 to 5 carbon atoms, polyols having 2 to 8 carbon atoms, C₃-C₄ ketones and C₂-C₄ aldehydes.

17. Composition according to Claim 15, wherein the water or the mixture of water and hydrophilic organic solvent(s) is present in an amount 25 ranging from 0.1% to 90% by weight, relative to the total weight of the composition, and preferably from 0.1% to 60% by weight.

18. Composition according to Claim 1, characterized in that it comprises a film-forming 30 polymer.

19. Composition according to Claim 18, wherein the film-forming polymer is selected from the group consisting of vinyl polymers, polyurethanes, polyesters, polyamides, polyureas and cellulosic 35 polymers.

20. Composition according to Claim 18,
wherein the film-forming polymer is present at a
polymer solids content ranging from 0.1% to 60% by
weight relative to the total weight of the composition,
5 preferably from 0.5% to 40% by weight and better still
from 1% to 30% by weight.

21. Composition according to Claim 1,
characterized in that it comprises a colorant.

22. Composition according to Claim 21,
10 wherein the colorant is selected from pigments, nacres,
fat-soluble dyes and water-soluble dyes.

23. Composition according to Claim 21,
wherein the colorant is present in an amount ranging
from 0.01% to 30% by weight, relative to the total
15 weight of the composition.

24. Composition according to Claim 1,
characterized in that it comprises a cosmetics additive
selected from antioxidants, fillers, preservatives,
perfumes, neutralizing agents, thickeners, surfactants,
20 cosmetic or dermatological active agents, plasticizers,
coalescents and mixtures thereof.

25. Composition according to Claim 1, being
a makeup composition, a makeup base, a "top-coat"
composition to be applied over makeup, or a keratin
25 fibre care or treatment composition.

26. Composition according to Claim 1, being
an eyelash coating composition, in particular an
eyelash makeup composition, also called mascara, a
composition to be applied over an eyelash makeup, all
30 called top-coat, or else an eyelash treatment
composition, in particular for treating the eyelashes
of human beings or false eyelashes.

27. Composition according to Claim 26, being
a mascara.

35 28. Cosmetic method for treating or making

up keratin fibres, which comprises applying to the said keratin fibres a composition according to any one of Claims 1 to 27.

5 29. Method of coating eyelashes, which comprises applying to the eyelashes a composition according to any one of Claims 1 to 27.

30. Use of a composition according to any one of Claims 1 to 27 for making up keratin fibres.

10 31. Use of a composition according to any one of Claims 1 to 27 for obtaining an easy and homogeneous application and a makeup which exhibits an excellent volumizing effect and which permits a rapid makeup for keratin fibres.
